

We belong to the Boulder Amateur Radio Club and have helped 150 Kids get licenced, in the last 11 years. Have HF privilidges and beable to do public service. Broad Band over the Power Grid will icreace the local noise level to the point which will prevent long range emergency communictions. I will have wasted my time Helping these kids get licensed and then not being able to cumincate.

Please do not allow pollute the spectrum to the point that it is useless.
